

TAX REPORT

3rd Quarter 2024

This Tax Report details the cash outflows made by Petrobras with the collection of taxes and government take in the first nine months of 2024. The information follows the cash basis method and should be read along with the Tax Report of 2023, on which the compliance aspects and tax risk management of the Company are presented, as well as the tax policy, with its principles and guidelines, among other information about our role as one of the largest taxpayers in the Brazilian economy.

Petrobras collected R\$ 202.4 billion for the Government from January to September 2024, which represented a 16% increase in the payment of taxes and Government Take (Gov. Take), compared to the same period in 2023, driven by the higher collection of ICMS (VAT), CIDE, PIS, COFINS and Royalties.

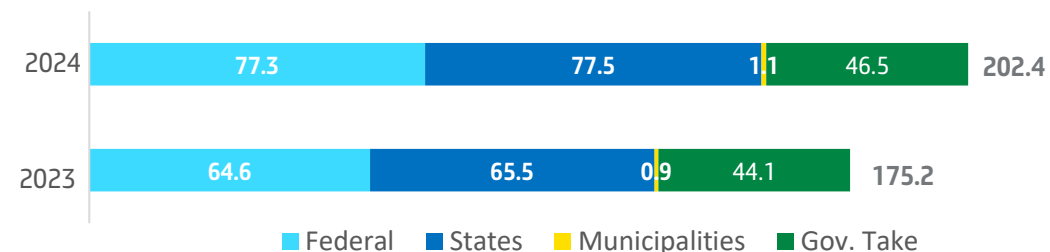

The total amount collected includes R\$139.2 billion in taxes due directly by Petrobras from its own operations; R\$ 46.5 billion in Gov. Take and R\$ 16.7 billion in taxes withheld from third parties, since the company has the legal obligation to collect them throughout the production chain, as a tax substitute.

An amount of R\$ 124.8 billion, which is composed of R\$ 77.3 billion as Federal taxes and R\$ 46.5 billion as Gov. Take, was paid to the Federal Government. According to the current legislation, this entity distributes part of this value to the States and Municipalities. When compared to the same period of the previous year, there is a 14% increase in the total tax collected destined for the Federal Gov, explained by the higher collection of PIS and COFINS due to the reinstatement of taxation on the sale and import of diesel oil, biodiesel and industrial LPG, contributions that were subject to a zero tax rate until 12/31/2023.

In terms of state tax collections, Petrobras experienced a 18% increase compared to the same period in 2023, with a disbursement of R\$ 77.5 billion. This growth is mainly justified by the increase in the ICMS single-phase regime's tax rate, starting from 02/01/2024, levied on fuels.

The municipal taxes amounted to R\$ 1.1 billion, representing a 13% increase compared to the same period of the previous year. The value is primarily distributed between IPTU (Urban Property Tax) and ISS (Service Tax).

Please find below the distribution of taxes paid by Petrobras, segregated by its fiscal nature:

Collection History of the 3rd Quarter
(R\$ billion)

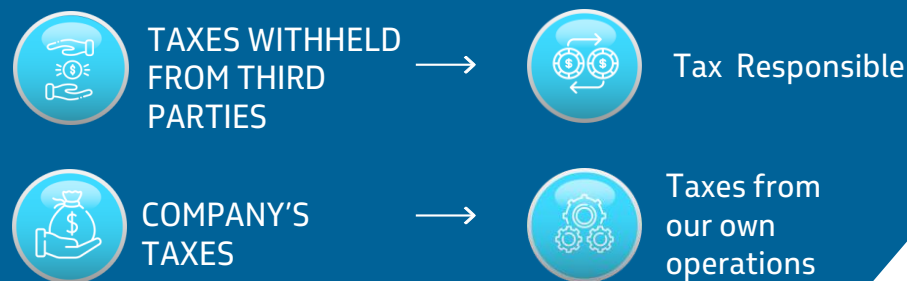

Collection History of the Last 4 Quarters
(R\$ billion)

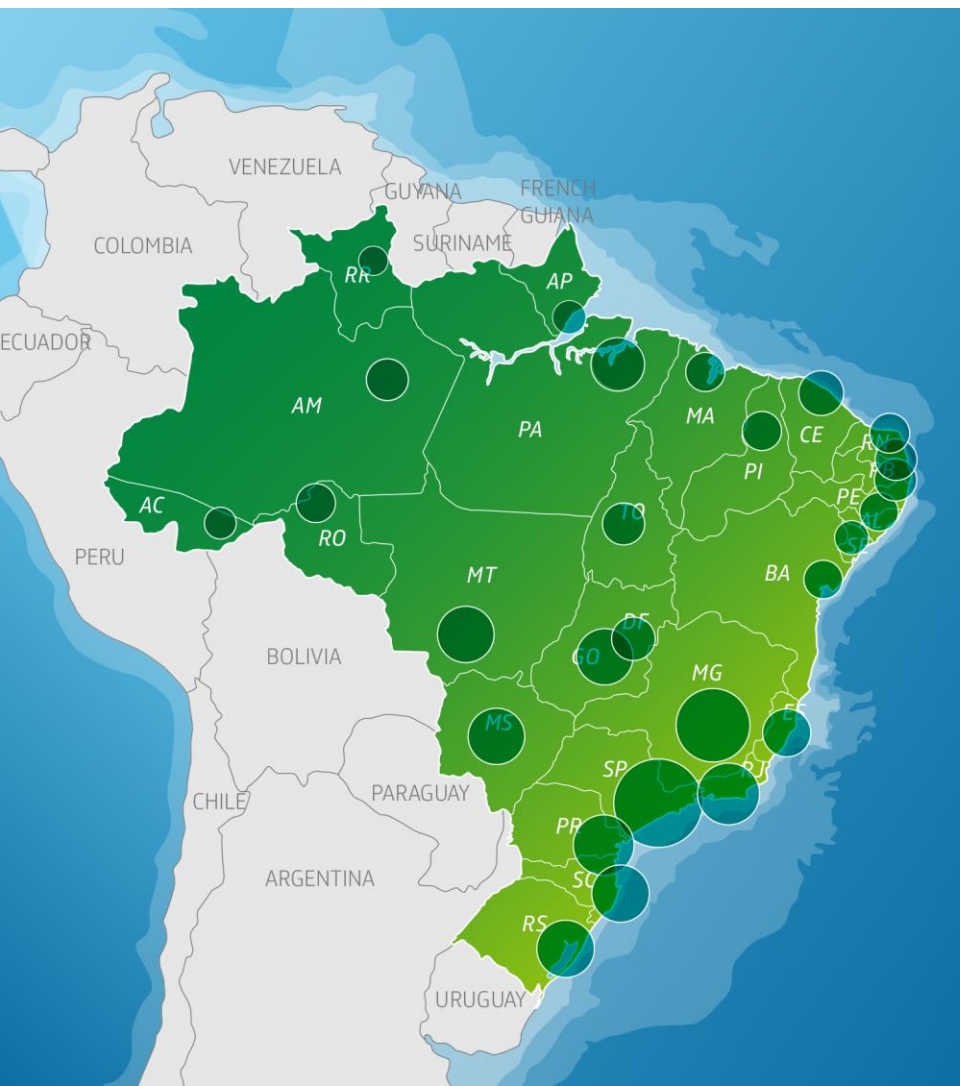

Petrobras had a 14% increase when compared to the same period of the previous year, with collection in this third quarter of R\$64.4 billion: R\$ 43.8 billion correspond to its own taxes, R\$ 15.6 billion come from Government Take and R\$ 5 billion are taxes withheld from third parties.

In the last 4 quarters, Petrobras paid R\$ 267.3 billion to Government as Taxes and Government Take.

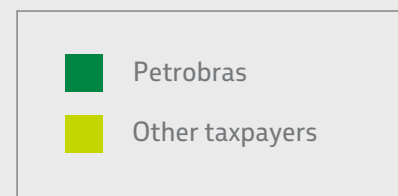

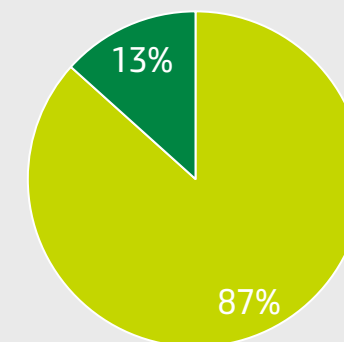

Petrobras plays an importante role in ICMS (VAT) collection as a taxpayer due to its own operations, as well as a tax responsible for operations carried out by third parties. Petrobras represents more than 10% of 20 States's ICMS collection, a fact that reinforces the importance of the company for the country. In the table below, it is possible to observe the total ICMS collected by Petrobras for each State of the Federation and its percentage contribution to the total of ICMS collected.
